Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

There is no definite antecedent basis for "the seat back frame" and "the backrest frame".

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1,4-7,10 and 11 are rejected under 35 U.S.C. 102(e) as being anticipated by Shats et al.

Figures 1-3 show structure as claimed, including a seat 24, a seat back 28 and a backrest 26 displaceably arranged relative to the seat by means of a locking mechanism 40,42,46 having a concealed operating mechanism 38a,50.

Note that the backrest is movable from a position substantially in register with the seat (fig. 2a) to an extended position (2b).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at

the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kuebler.

Figure 1 shows structure similar to that claimed, including a seat base 12, back frame 14, and displaceable backrest 16. To have formed the back and backrest as upholstered box frames, for aesthetic purposes, would have been obvious to one with ordinary skill in the art, as such are old and well known in the art.

Claims 1,8 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Opsvik.

Figures 1 and 6 show a backrest 3 that is displaceable relative to a seat back 14 by means of a pneumatic displacement system 30.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Burritt, Schmidt, Barabas, Proctor, Zacharkow, Scolari and Galloway show various features of the invention.
